

[Pet Health- Reminder](#)

Postby [HPS Shannon](#) » Sun Aug 12, 2018 3:16 am

As was mentioned in HP Maxine's recent sermon, animals are sacred in Satanism and we should treat them with much respect and this especially goes for our pets.

A couple weeks ago, my mother's cat was near death and shutting down from kidney disease and severe dehydration. My sister called me to let me know what was going on, when I got to my mother's home, she was in bad shape. It was very very sad because I was the one who found her on the streets about 12 years ago, took her in and had her since. The worse thing is, I was the only one who seemed deeply affected and unsettled by the cats condition.

The Vet told us that she had kidney disease and a couple other problems related to it. Thankfully after treatment from the Vet and some blessings from the daemon goddess Haagenti, she is doing much better. The problem is she was eating low quality, toxic dry food for years.

Kidney disease and chronic renal failure are very high in domestic house cats and almost all cats get them. The problem is in dry food that is sold as pet food, among a couple other things. Wet food is what cats should be eating. Cats are especially not known to drink lots of water because they naturally get their moisture and hydration from their prey and kill, or "wet" food. The dry food is dehydrating and is a source of low quality protein.

The same goes for dogs, but this goes especially for cats.

There are also other horrors of what goes into a lot of commercial and generic dry food. Years ago HP Maxine and a couple other members posted videos and links about it--it is horrific. Dead pet carcasses and other things like road kill, harmful chemicals, etc.

My mother's cat now lives with me, and my other cat, where she now has access to pure filtered water, high quality wet food and a better living environment. I want to make sure she has a good rest of her life. As many of you know, especially the more psychically open you are, our pets are very connected to us and the connection is strong. I had a hard time eating and focusing knowing that she was suffering and in pain. We all should pay attention to our pets, it takes more than just simple food and water to maintain their health nowadays.

My only regret is that I didn't take her into my possession sooner.

The first way you can improve the quality of your pet's health is by switching over to better quality food, especially if you have the resources and finances for it. HP Maxine posted a good pet food recipe in the groups some years ago. I personally buy my cats food. No matter your financial case, please do the best you can and ask the gods for assistance. Even simple canned wet food is better than that dry boxed food...

Learn to develop your healing abilities that comes through power meditation, it'll go a long way in helping your pet.

Here is a link to quality foods:

As of now, I am treating my cat with a traditional chinese herb blend for her kidneys, eyesight and blood pressure, in addition to giving her subcutaneous fluids. I also feed my cats liver from chicken and turkeys as well as broth and bone marrow soup for the immune system and blood.

If any of you are interested in discussing herbal remedies and ways to heal your pet of disease and illness, feel free to do so in the Satanic Health forum or the forum for Pets. Our member CentralForce is very learned and is a practitioner of Traditional Chinese Medicine and knows other health information. If any of you need any further assistance, you can contact him or myself in addition to posting on the mentioned forums.

Be well.

Also, for those of you who have pets with Kidney disease, they vets will tell you to put your cat on a low protein diet. I don't recommend this in MOST cases. In the case of my cat, she had anemia due to low kidney functioning, low protein food would not allow her body to repair and preserve her kidneys nor would it be good for the blood and its development. Cats NEED meat and protein.

Here is also an article showing that high protein does not affect kidney issues. For those who need more information on this.
